HI-MACS[®]

Acrylic Solid Surface

Distributed by
Laminex

What is HI-MACS[®] Acrylic Solid Surface?

An outstanding material.

HI-MACS[®] is a composition of acrylic, minerals and natural pigments that combine to create a smooth, non-porous, thermoformable and visually seamless surface.

The material meets the highest standards for quality in all respects: material performance, fabrication, functionality and hygiene. Thanks to these qualities and the outstanding flexibility in fabrication and design, HI-MACS[®] offers countless advantages over conventional materials.

HI-MACS[®] is now exclusively distributed by Laminex. An expanded palette of over 60 colours is available, curated for contemporary Australian design trends. This includes 36 brand new colours, never before launched in Australia.

HI-MACS[®] excellent qualities at a glance.

Huge Range

Over 60 colours and decors in stock.

Thermoformable

Create three dimensional designs for complete creative freedom

Seamless

Create large areas with no visible join, or seamlessly integrate basins and sinks

Translucent

Achieve spectacular light effects with the Lucents range

Durable

Easy to restore and repair

Hygienic

Non-porous and 99% impermeable to viruses, dirt, chemicals and bacteria

Safe & Easy

Silica free making it safe to fabricate with cabinet making tools

HI-MACS®. The solid surface material for a particularly hygienic environment.

Especially suitable for decontamination of dangerous viruses such as HIV-1 and SARS-CoV-2

No chance for dirt and pathogens.

HI-MACS® is resistant to mould, dirt, viruses, bacteria and numerous chemicals and has been internationally certified*.

Resistant to bacteria

Resistant to chemicals

Resistant to viruses

Seamless production for easy cleaning.

The hygienic properties of HI-MACS®.

Seamless, easy-care finish

HI-MACS® has a smooth, easily maintainable and pore-free surface: liquids and germs cannot penetrate. Seamless processing prevents bacteria or mould from settling and enables thorough and quick cleaning so that cross-contamination and germs during treatments have no chance.

Chemical resistance

HI-MACS® can be maintained using the strongest detergents, from house- hold chemicals to those used to clean operating theatres, while retaining a "like-new" appearance.

Functionality meets design

With its flexible formability and wide range of colours, HI-MACS® offers exceptional design possibilities and all the prerequisites for a sterile environment.

* certified by an independent laboratory, according to the international standards LGA and NSF

HI-MACS® Ultra-Thermoforming & HI-MACS® Intense Ultra

Extreme curves

The HI-MACS® Ultra-Thermoforming formula allows for even more extreme curves. The minimum inner radius of 6 mm (usually 50 mm) offers a completely new design dimension. This product has 30% greater flexibility, which allows designers to create much sharper curves. Even the smallest radii can be created without affecting the material properties.

Especially in furniture design, where it is often about filigree details, but also in the kitchen and bathroom, the new feature offers clear advantages: the radii of deep-drawn basins can be made significantly smaller, which improves the appearance and size of the basin.

The new ultra-thermoforming quality in popular Alpine White is available in a thickness of 12 mm and can be used indoors and outdoors. The same warranty conditions apply as for all other HI-MACS® sheets.

Intense Ultra

The aptly named Intense, which is a brand new material formulation, gives a powerful and remarkable performance. The product range combines the characteristics from two disparate worlds: Intense Colour Technology and Ultra-Thermoforming.

Dark colours become more "intense", darker and also more resistant, with less visible scratches. The new formulation allows for colour consistency during and after fabrication, maintaining the dark colour when worked, producing less sanding dust and leaving fewer sanding marks on the surface and edges.

HI-MACS® Intense Ultra was awarded the prestigious Archiproduct Design Award.

HI-MACS® Sinks and Basins

Perfect for kitchen, laboratory and bathroom.

The comprehensive range of sinks and basins available in HI-MACS®, means architects and designers have all the options to design functional and beautiful kitchens and bathrooms, sanitary facilities, hospitals and much more. With the exception of some countertop bathroom bowls, all these products are designed to be flush- or under-mounted, in combination with HI-MACS® sheet materials.

Sinks and Basins
