# Positive Progress

**As a proud Australian manufacturer, sustainable practices are an important part of our manufacturing capabilities. We maintain a conscious commitment to environmental and social sustainability and achieving our goals across all of our operations through our sustainability program, Positive Progress.**

### GreenTagCert™ Certification

Global GreenTag is a Product Sustainability Certification, Product Health & Environmental Product Declaration Program Operator relevant to all of the major green building rating tools in the world including;

- LEED® (167+ countries)
- International WELL™ Building Standard (60+ countries)
- Green Star® Australia, New Zealand and Africa (56+ countries)
- Green Globes® (21+ countries)
- BREEAM® & BREEAM® International (78+ countries)
- EarthCheck® (70+ countries)
- LOTUS
- Infrastructure Sustainability 'IS' Tool

### Timber Certification

As one of Australia's largest manufacturers of wood products, Laminex supports responsible forest management and is committed to producing quality products from quality materials that are backed by globally recognised certifications. We source our raw materials from suppliers who have been independently verified as compliant to chain of custody standards, meaning that materials are produced using wood fibres sourced from certified sustainably managed forests to Responsible Wood/PEFC (Programme for the Endorsement of Forest Certification) Certifications.

Our manufacturing facilities hold their own PEFC certifications. This means all certified wood products from these facilities can be traced from plantation to final manufactured product.

### Sustainable Manufacturing Initiatives

Laminex Australia also maintains ISO 14001 Environmental Management System certification for all manufacturing sites and is progressively embarking on a number of waste and emission reduction initiatives to reduce our overall environmental impact.

Find all of our documentation, certificates and reports at **laminex.com.au/about-us/sustainability**

# Protec+ | Antimicrobial Technology

**EFFECTIVELY REDUCES COVID-19 VIRUS**

Now more than ever, we understand the importance of maintaining hygiene in interior spaces we frequently touch, such as cabinetry, countertops, tabletops and toilet and shower partitioning. Laminex has taken the lead with the introduction of Protec+, an antimicrobial surface technology that inhibits the growth of bacteria, fungus and now COVID-19 virus. Protec+ is now manufactured as standard into selected Laminex high-pressure laminate (HPL), including AbsoluteMatte HPL, as well as Laminex Multipurpose Compact Laminate, Laminex Aquapanel and Laminex Structural MR® MDF.

## Protec+ Fast Facts

**Peace of mind**
Laminex Protec+ properties do not wipe off or leach out of the surface. This gives you enhanced antimicrobial protection for the expected life of the surface.

**Cleaner environments, everywhere**
Laminex Protec+ can be used to create a safer, cleaner environment anywhere, including hospitals, schools, hotels, shops, cafes, sport facilities and public toilets.

**Proven Effectiveness**
Laminex Protec+ has been independently tested in accordance with a number of leading standards, including: ISO22196:2011, ISO 21702:2019, JIS Z2801 and ASTM G21, which measure antimicrobial activity, fungi resistance and COVID-19 virus resistance.

# Large Format Commercial:
## Laminex Structural MR® MDF

**The Laminex Large Format Commercial Range comprises the most popular Laminex decors, in versatile 3600 x 1800 panels for applications such as cabinetry, wall panelling, partitioning and office furniture.**

For demanding projects where surface hygiene and durability are required, the range is now also offered in Laminex Structural MDF. The robust MDF core provides superior impact resistance, with the 18mm version even featuring an extra high density core for up to twice the impact resistance of Laminex Vertiboard 18mm.

Laminex Structural MDF also includes Protec+ antibacterial and antifungal technology which has been proven effective against COVID-19, reducing the amount on the surface by 88% after 24 hours in independent testing (ISO 21702:2019).

# Décor Feature | The Laminex Plywood Series

**Laminex Plywood Décors have been painstakingly designed to deliver the authentic appeal of real plywood with the hard-wearing performance of Laminex.**

### Benefits of Laminex Décors Plywood Laminate over plywood

The laminex performance characteristics – durability, cleanability and ease of maintenance, stain resistance, UV resistance and colour stability – are the most obvious reasons for specifying Laminex Plywood Décors over real ply, but there are others. Installation is much simpler, for example, because the laminated panel is pre-finished, there's no lacquering or staining; it just has to be cut to size and edged.

Laminex manufactures Plywood Laminate locally in Australia which creates a supply chain and cost advantage, compared to the imported plywood materials that can have logistic issues.

# Laboratory Compact Laminate

Worktops are a critical element of laboratory furniture and the selection of material used is vital to the efficient and effective functioning of the laboratory environment. Laminex Laboratory Compact Laminate is the premium choice for vulnerable surfaces, with superior moisture, wear and chemical resistant properties. With machinability similar to that of hardwood, it's a versatile material that can easily incorporate sinks, drip-cups and tap-holes.

Laminex Laboratory Compact Laminate is proudly made in Australia.

Laminex Laboratory Compact Laminate features an Electron Beam Cured (EBC) surface for enhanced chemical resistance and hygienic properties.

Tested against 130+ chemicals, including Silver Nitrate, making this surface suitable for both horizontal and vertical applications in spaces that require the use of harsh chemicals or vigorous cleaning regimes.

It resists acids, alkalis, corrosive salts and other destructive or staining substances, and is graffiti resistant.

Laminex Alfresco Compact Laminate delivers superior moisture, wear, UV and weather resistance. Its distinctive black core eliminates the need for edge treatment and serves as a striking design feature. Available in 11 décors it's a low maintenance alternative to wood and other outdoor products.
# Made-to-Measure Compact Laminate

The Laminex Made-to-Measure offer is a hassle-free, ready-to-install compact laminate panel solution. This service easily allows customers and tradespeople to use compact laminate for a variety of internal and external applications, and is ideal for large or small projects, from alfresco kitchens - including doors, panels & benchtops, to restaurant tabletops, laboratory benchtops and doors, and loose commercial furniture.

## Pay for only what you need

Panels are customised and charged on a square metre rate, you only pay for what you need. No minimum order applies to this offer.

## No additional delivery fees and convenient lead time.

Regardless of the order size or location, you are only charged with the standard Laminex 'first order of the day' fee. From when your order is accepted, our standard lead time is only 10 business days plus delivery. For larger orders, the standard lead time may be impacted. We will inform you of your new lead time once it is entered into the system.

## Superior Quality Substrates

Made-to-Measure Compact Laminate is available in all grades of Laminex Compact Laminate, which are proudly Australian made. All substrates are Global GreenTag certified and feature Protec+ Antimicrobial Technology for added protection and peace of mind.

## No need for specialty equipment

There is no need for specialist cutting and lifting equipment, as the compact laminate panels are custom made - including the option of routering and predrilling for handles and hinges - to meet your design needs.

## Edge Profiles

| | | | |
|---|---|---|---|
| 2mm Aris | 8.5mm Radius Bull Nose | Straight Cut | Sharknose |
## Warranties:

# Waterloo™ Partitioning Systems

Laminex Waterloo Partitioning Systems will give you a quality complete fitout that will be admired for years to come. Laminex Waterloo is made from high quality Australian Made Laminex substrates, backed by 90 years of expertise for quality you can trust. Assembled locally in Australia using only Global GreenTag certified Laminex substrates, the Laminex Waterloo range includes Shower and Toilet Partitions, Locker Systems, Vanities, Seating, Privacy Panels and Wall Panels. These can be customised for applications ranging from offices, retail spaces, health care facilities, educational facilities, sports and recreation venues and everywhere in between.

## Why use Laminex Waterloo Partitioning Systems?

### National Coverage
- National distribution coverage
- Nationwide approved referral installation network
- National sales & after sales support

### Superior Quality
- Made from quality Laminex substrates with Global GreenTag certification
- Quality and durable system designs including:
  - Reinforced aluminium head rails for system strength
  - Anodised aluminium hardware & stainless steel screws
  - Rounded panel/door edges for added safety measures
- In-house design & manufacturing with total control of the process from start to finish.

### Antimicrobial Surface Technology
- Laminex Multipurpose Compact Laminate and Structural MR MDF features Protec⁺ Antimicrobial Technology, which inhibits the growth of fungal, bacterial and COVID-19 virus properties.

### Proud Australian Manufacturer
- Assembled in regional Australia
- Made from Australian made substrates.

### Superior Warranties & Guarantees
- Laminex Compact Laminate Warranty - 10 years
- Laminex Structural MR® MDF Warranty - 7 years
- Partitioning Door Hardware Replacement Guarantee - 5 years

For full technical details, refer to the Technical Support Information available at **laminex.com.au**
For all Laminex Waterloo Partitioning Systems enquiries, please call 132 136 (Option 5) or email us at **partitioning@laminex.com.au**

# Chemical Resistant Laminate

Laminex Chemical Resistant high pressure laminate surfaces are designed to provide advanced protection against damaging chemicals in any number of harsh environments. Economical, durable, stylish and easy to maintain, the innovative laminate construction is intended for interior horizontal and vertical applications.

These surfaces feature improved chemical resistance to acids, alkalis, corrosive salt, and other destructive or staining substances. They're suitable for horizontal surfaces including counters, laboratory benches and tabletops. Ideal vertical surfaces include cabinets, casework fronts, wall splashback panels or screens.

Laminex Chemical Resistant Laminate is proudly made in Australia.

# Metallic Laminates

The refined glamour of metallic surfaces and features is timeless. From brilliant accents to statement panelling, metallics bring drama and sophistication to any space.

Elevate commercial interiors with our innovative collection of radiant metallic surfaces, manufactured from real metal foils. Featuring tones found in the tapware, handles and hardware industry, this range has an option for all projects.

## Technical Details

| Sheet Size | Thickness | Weight | Finish |
|---|---|---|---|
| 2400mm x 1200mm | 0.8mm to 1.3mm | 1.5kg/m² approx (1mm) | Various |

**Note:** Special fabrication requirements apply to Brushed Stainless Steel laminate. Not to be used in high humidity environments as corrosion of the metal foil may occur. Care should be taken with handling and fabrication as damage to the protective surface lacquer will lead to corrosion of the metal. Avoid metal to metal contact when using fittings; use a mastic or gasket to prevent metal to metal corrosion.

# CustomArt™ Surfaces

Laminex CustomArt Surfaces help you build exciting, dynamic and ever inspirational interiors. Made locally in Australia, they are custom built to ensure you achieve your ideal vision. Perfect for just about any internal application, you can choose a design from our exclusive collection of colours, patterns, photographs or text, or create your own unique palette or print. Whatever you decide, the result will be outstanding. So for eye catching doors, walls, benchtops, ceilings and more, explore the stunning possibilities with Laminex CustomArt Surfaces.

Laminex CustomArt Surfaces offer a range of laminate grades. This means they can be used for internal application.

### Standard Laminate (Xtra Grade)

CustomArt Xtra Grade is a general purpose laminate for interior applications, including benchtops, tabletops, furniture, wall murals, interior signage and exhibition displays. Its hard surface finish provides added durability against scratching, wear and graffiti. CustomArt Xtra Grade requires bonding to a suitable substrate prior to installation.

To learn more about the process visit **laminex.com.au**

### Compact Laminate

With enhanced durability and impact resistance, CustomArt Compact Laminate is the perfect solution for Custom furniture, lockers, tabletops and so much more.

# Writable Surfaces

Laminex Writable Surfaces help you turn every day surfaces into dynamic zones for sharing and collaboration. The magnetic laminate panels have a decorative face which can be written on with a whiteboard marker and easily cleaned. With product options that include an embedded metal foil layer to ensure magnetic objects hold strongly to the surface, Laminex Writable Surfaces are the ultimate functional solution for creative spaces.

The Laminex Writable Surfaces range is perfect for school or university classroom walls, office wall or partitioning surfaces, meeting and board rooms and restaurant menu boards, tabletops and desktops.
